DOGGYWELL · COMPLEMENTARY FEED FOR DOGS

DoggyWell Intestine

A paste with the probiotic lactic acid bacterium *Enterococcus faecium* — settles digestive upsets and returns the gut flora to balance after a feed change, stress or antibiotic therapy.

DOSE	DURATION	SPECIES	PACKAGING
5 ml / 10 kg	1 week	Dogs	30 ml

HOW IT WORKS

The lactic acid bacterium *Enterococcus faecium* passes through the stomach undamaged and multiplies rapidly in the small intestine. The physiological gut flora stabilises and feed digestibility improves.

It promotes the formation of immune cells and helps fend off pathogens, so vitamins and minerals from the ration are used more effectively.

BENEFITS

- Supports a balanced gut flora
- Recommended during digestive upsets
- Suitable with intolerances and allergies
- May support the immune system
- Improves feed digestibility
- Applicator for precise dosing

ADMINISTRATION

INSTRUCTION	RECOMMENDATION
Dose	**1 teaspoon (≈ 3 ml) per 5 kg body weight daily**
Duration	Over eight weeks
Method	With the feed or directly into the mouth
Before use	Shake the bottle well

Consult a veterinarian before use or before extending administration.

ADMINISTRATION
