Oralade®

Rehydration starts with taste.

An isotonic oral rehydration solution for dogs and cats, developed with vets and nutritionists. Ready to serve, highly palatable, free from citrates and preservatives.

Recommended by vets. Chosen by pets.

> Dehydration is rarely a problem of the fluid itself — the problem is intake. An animal that refuses water will not drink water with electrolytes either. So Oralade starts with taste: chicken liver hydrolysate makes the solution appealing, and **an isotonic balance of sodium, potassium and glucose** lets fluid and electrolytes be absorbed quickly, without burdening digestion.

Why Oralade works

Four formulation principles

High palatability

Natural chicken liver flavour encourages voluntary fluid intake — where water fails.

Isotonic formula

Osmolarity close to the body's: fast electrolyte absorption without osmotic pull of water into the gut.

Hypoallergenic

Hydrolysed protein — suitable even for patients with dietary restrictions.

Clean formulation

No citrates and no preservatives. Purified water as the base, ready to serve.

Advanced range — targeted support

For dogs and cats · 500 ml · complementary feed

ADVANCED

GI+

Oral rehydration and digestive support

USE

- Diarrhoea, vomiting and **fluid loss**
- Gradual return to food after fasting
- Recovery after procedures and during hospitalisation

KEY INGREDIENTS

Chicken liver hydrolysate 1.5 % · dextrose monohydrate · sodium and potassium chloride · **fructooligosaccharides (FOS) 1000 mg/kg** · glycine 4000 mg/kg.

Analysis: moisture 96 % · crude protein 1 % · sodium 0.14 % · potassium 0.08 % · phosphorus 0.027 % · **14 kcal/100 ml**

ADVANCED

RF+

Oral rehydration and kidney support

USE

- Chronic kidney disease and **encouraging water intake**
- Urinary tract support
- Older patients with low fluid intake

KEY INGREDIENTS

Chicken liver hydrolysate 2 % · **lysine and arginine 1500 mg/kg each** · taurine 800 mg/kg · L-carnitine 100 mg/kg.

Analysis: moisture 98 % · crude protein 1 % · sodium 0.1 % · potassium 0.04 % · **phosphorus 0.003 %** · 12 kcal/100 ml

Active+ — everyday hydration

Enhanced hydration for dogs · 250 ml, ready to serve · four natural flavours

Oralade

While the **Advanced** range is meant for the patient at the clinic, **Active+** is for every day at home: after a long walk or training, in hot weather, when travelling and for dogs that simply drink too little. The same isotonic base, with added L-carnitine and vitamin E.

Chicken
The classic, most widely accepted flavour

Duck
For fussy dogs

White fish
A light alternative to poultry

Vegetable
No ingredients of animal origin

Additives per kg: L-carnitine 500 mg · vitamin E 100 mg · glycine 4000 mg. Energy value 16 kcal/100 ml. Also available as a liquid concentrate, 7 × 50 ml.

How to use

Four ways

01
As a drink
Pour into a bowl and offer alongside water. Do not dilute when offered as a drink.

02
Diluted
Add to the water bowl to increase total daily fluid intake.

03
Poured over food
A topper for dry or wet food — boosts palatability and water intake.

04
Frozen
Freeze into cubes as a treat in hot weather or after exercise.

Recommended daily amounts

BODY WEIGHT	PER DAY
Cats and small pets — up to 4 kg	**up to 200 ml**
Small dogs — 4 to 10 kg	**200–450 ml**
Medium dogs — 10 to 25 kg	**450–825 ml**
Large dogs — 25 to 45 kg	**825–1350 ml**
Very large dogs — 45 to 60 kg	**1350–1560 ml**

Values refer to total daily fluid intake. For a sick patient, the vet decides the amount and duration.

When to reach for Oralade

- After diarrhoea or vomiting, with mild fluid loss
- Before and after procedures, during recovery
- For dogs and cats that simply drink too little
- In hot weather, when travelling and after exercise
- For older patients and chronic kidney disease

Storage. After opening, keep refrigerated and use within **4 days**. Can be frozen. Complementary feed for pets — it does not replace a veterinary diagnosis or parenteral therapy in severe dehydration.

Advanced GI+
500 ml ready to serve
6 × 50 ml liquid concentrate
Dogs and cats · digestion and rehydration

Advanced RF+
500 ml ready to serve
6 × 50 ml liquid concentrate
Dogs and cats · kidneys and urinary tract

Active+
250 ml ready to serve
7 × 50 ml liquid concentrate
Dogs · four flavours, everyday hydration
