

FEED ADDITIVE • TARGET SPECIES: SWINE (SOWS, FATTENING PIGS, BOARS)

Thermo[®] Control

Complete heat stress protection for swine combining spices, phyto-ingredients, and buffer substances. Acts on both the root causes and symptoms of heat stress to maintain comfort and performance.

Key Benefits

- ✓ Complete protection against heat stress effects
- ✓ Maintains feed intake during high temperatures
- ✓ Addresses respiratory alkalosis with buffer substances
- ✓ Combination of spices and patented phyto-ingredients
- ✓ Supports thermoregulation in sows and fattening pigs
- ✓ Provides cellular protection via phyto-ingredients
- ✓ Protects reproductive performance in sows and boars
- ✓ Products tested and approved worldwide

Product Characteristics

Form	Powder (feed incorporation)
Composition	Spices, phyto-ingredients, buffer substances
Target species	Sows (maternity), fattening pigs, boars
Origin	Made in France (CCPA Group)

Mode of Action

Thermoregulation	Spices regulate body temperature and stimulate feed intake
Cellular protection	Phyto-ingredients strengthen natural antioxidant defenses against oxidative stress from heat
Feed intake	Active ingredients stimulate appetite and maintain ingestion levels during hot periods
Respiratory alkalosis	Buffer substances compensate for CO2 losses from increased panting rate

Feeding Recommendation

CATEGORY	DOSAGE	DURATION
Sows in maternity	2 kg/t of complete feed	Continuously during heat stress periods
Fattening pigs	1.5 – 3 kg/t of complete feed	Continuously during heat stress periods
Boars	3 kg/t of complete feed	Continuously during heat stress periods

Important: Start Thermo Control at least 15 days before the beginning of the expected heat period for optimal efficacy.

When to Start

Begin supplementation at least 15 days before expected heat periods. Use continuously throughout constant or chronic heat stress for consistent protection.

Why Swine Are Vulnerable

Pigs cannot sweat and rely on panting to cool down, making them particularly susceptible to heat stress. This leads to reduced feed intake, poor growth, and reproductive losses.

Packaging & Storage

Powder for continuous feed incorporation. Store in a cool, dry place protected from direct sunlight. Made in France by CCPA Group.

About CCPA Group

CCPA Group is a French family-owned company specializing in animal nutrition since 1966. The Thermo[®] range addresses heat stress across all major livestock species with proven, science-backed solutions. ThermoTool™ app available for monitoring heat stress risk levels. Distributed in Croatia and the region by Need4Feed d.o.o.
