KANTERS · LIQUID VITAMINS FOR POULTRY

AD_3EK_3

A complete fat-soluble vitamin blend dosed through drinking water — for immunity, bone development, skin integrity and blood coagulation during periods of stress and recovery.

SPECIES	FORM	DOSAGE	PACKAGING
Poultry	Liquid	0.5–1 L / 1,000 L	5 L

DESCRIPTION

AD_3EK_3 delivers all four critical fat-soluble vitamins in a single, easy-to-dose formulation — immunity, bone health, antioxidant protection and coagulation support in one application.

The vitamins are dosed via drinking water. A healthy animal drinks roughly twice as much as it eats, and during sickness or stress feed intake drops while water intake is maintained — which makes water the most reliable route of administration precisely when support matters most.

COMPOSITION and action

VITAMIN A	Supports resistance to infection. Protects and regenerates skin and mucous membranes.
VITAMIN D_3	Regulates the calcium–phosphorus balance. Essential for skeletal development in broilers and layers.
VITAMIN E	Powerful antioxidant. Protects cells from oxidative stress during heat, transport and disease challenge.
VITAMIN K_3	Improves blood coagulation. Positive influence on liver, heart and muscle function.

BENEFITS

- Immune support during heat stress
- Regulates calcium and phosphorus metabolism
- Protects and regenerates skin and mucosa
- Supports bone and skeletal development
- Antioxidant protection of body cells
- Improved coagulation and liver function

WHEN TO USE

CATEGORY / SITUATION	INDICATION
Fast-growing broilers	**Supports skeletal integrity and immune function during rapid growth phases.**
Laying hens	Calcium–phosphorus balance, critical for shell quality and egg production.
High infection pressure	Vitamins A and E reinforce the immune response during disease challenge or vaccination.
Heat and transport stress	Vitamins D_3 and E reduce oxidative cell damage in stressed flocks.

Align dosage and duration with veterinary advice and the total ration.

DOSAGE

STANDARD DOSE	0.5–1 L per 1,000 L of drinking water
DURATION	3–5 consecutive days, depending on the indication
PREPARATION	Add to a clean drinking system; prepare the solution fresh each day

> **Regulatory note.** Classified as a dietetic feed supplement under Regulation (EU) 2020/354, entry 52. Observe the prescribed period of use and the maximum nutrient levels in relation to the total ration.

PACKAGING
and quality

PACKAGING	5 L can
MANUFACTURER	Kanters Special Products BV, De Stater 32, 5737 RV Lieshout, The Netherlands
QUALITY	Produced under ISO 22000 certified conditions

KANTERS
liquid vitamins

Kanters provides total solutions to the farmer through a range of liquid supplements applied via drinking water. The range is divided into five functional groups: Hygiene, Balance, Care, Gut Health and Performance. AD_3EK_3 belongs to *Performance*.
