KANTERS · LIQUID VITAMINS FOR POULTRY

Multi-Fit

The only Kanters vitamin product for poultry that covers all six vitamin groups in one formulation — broad support without combining several products.

SPECIES	FORM	DOSAGE	PACKAGING
Poultry	Liquid	0.5–1 L / 1 000 L	5 L

DESCRIPTION

Multi-Fit combines fat-soluble and water-soluble vitamins in one blend — supporting immunity, digestion, the nervous system, bone health and antioxidant defence at the same time.

The vitamins are dosed via the drinking water. A healthy animal drinks roughly twice as much as it eats, and during illness and stress feed intake drops while water intake holds — which makes water the most reliable route exactly when support is needed most.

COMPOSITION and action

VITAMIN A	Supports resistance to infection. Protects and regenerates skin and mucous membranes.
VITAMIN D_3	Regulates the calcium–phosphorus balance. Key for bone development and eggshell quality.
VITAMIN E	Antioxidant. Protects cells from oxidative stress and supports immunity, especially in young animals.
VITAMIN K_3	Supports blood coagulation and liver function. Contributes to bone mineralisation.
VITAMIN C	Strengthens the immune response under heat stress. Synergistic antioxidant with vitamin E.
B-COMPLEX	Supports digestion and the nervous system. Especially effective during feed changes.

BENEFITS

- Supports the immune and nervous system
- Contributes to productivity and laying performance
- Promotes digestion of protein, fat and carbohydrates
- Antioxidant protection in stressful situations
- The broadest vitamin coverage in one formulation
- Supports recovery from vitamin deficiency

WHEN TO USE

SITUATION	INDICATION
Heat, cold or transport stress	**Vitamins E and C reduce oxidative damage; B-complex supports the nervous system.**
High infection pressure	Vitamin support strengthens the immune response during illness or vaccination.
Reduced immune response	The complete blend restores nutritional balance during periods of immunosuppression.
Feed changes and digestive challenges	B-complex stimulates digestive enzyme activity and eases the transition between feeds.
Laying support	Complete vitamin coverage contributes to laying performance and metabolic function.

Align dosage and duration with veterinary advice and the total ration.

PACKAGING
and quality

PACKAGING	5 L canister; 1 L bottle and 10 L canister on request
APPLICATION	Add to a clean drinking system; prepare the solution fresh every day
MANUFACTURER	Kanters Special Products BV, De Stater 32, 5737 RV Lieshout, the Netherlands
QUALITY	Produced under ISO 22000 certified conditions

KANTERS
liquid vitamins

Kanters liquid vitamins are dosed via the drinking water, making them a solution for periods of illness and stress when feed intake drops but water intake stays stable. The range is divided into five functional groups: hygiene, balance, care, gut health and performance. Multi-Fit belongs to the *performance* group.
