KANTERS · ALKALINE FOAM CLEANER

MultiFoam Alkaline

Alkaline foam for heavily soiled surfaces in animal houses — the foam layer stays on vertical surfaces for up to 30 minutes, so cleaning is finished with less water, energy and time.

SOLUTION	APPLICATION	CONTACT TIME	PACKAGING
0.5–5 %	300 ml/m²	10–30 min	22 / 216 kg

DESCRIPTION

MultiFoam Alkaline is a powerful alkaline foam cleaner developed for heavily soiled surfaces. Its composition makes it very effective at removing fat, protein and other organic soiling.

It is intended for cleaning animal houses, walls, floors and equipment before disinfection.

BENEFITS

- Clings strongly to vertical and smooth surfaces
- Effectively dissolves dirt, fat and grease
- Penetrates soiling and makes rinsing easier
- Extra-long-lasting foam layer for longer contact time
- Deep cleaning with less environmental load
- Less water, energy and time

WHY LONGER-LASTING FOAM

The strength of the product is that the foam layer stays on the surface for an extra-long time, giving a much longer contact time — up to 30 minutes. The result is deep cleaning that quickly removes surface soiling. A longer contact time also means the cleaning programme can be completed with fewer resources, reducing the overall load.

DIRECTIONS FOR USE

01 **Preparation**

Remove all loose dirt. Prepare a 0.5 % to 5 % solution depending on the degree of soiling.

02 **Application**

Apply the foam with a foam lance at 300 ml/m². Allow 10–30 minutes of contact time and do not let the foam dry.

03 **Rinsing**

Rinse all surfaces thoroughly with clean water at low to medium pressure. Let surfaces dry before starting disinfection.

> **Note.** Before first use, check that the product is compatible with the materials being cleaned. For the best result, use a separate disinfectant after cleaning.

PACKAGING and storage

PACKAGING	22 kg canister · 216 kg drum
STORAGE	Cool and dry, separate from other products; avoid contact with acids
SHELF LIFE	2 years from the production date when stored under the recommended conditions

QUALITY and production

Produced under ISO 22000 certified conditions by Kanters Special Products BV, the Netherlands. MultiFoam Alkaline is part of the Kanters *hygiene* line — complete solutions for cleaning and disinfection in livestock farming.
